POWER PLATFORM PORTFOLIO · 2024–2026

# *Joaquin* Rodriguez

Power Apps and Power BI solutions connecting workforce management systems to ADP, Azure SQL, and custom APIs.

Florida, United States
joaqorm@gmail.com

Enterprise applications built with Power Platform, Azure Functions, and cloud integrations.

POWER APPS

# *Canvas Applications*

Production Power Apps canvas applications connected to enterprise backends including ADP, Azure SQL, and custom Azure Functions.

POWER APPS | INCENTIVE PROGRAM SUITE

01

# Incentive Bonus Program Suite

A unified three-app system managing employee incentive bonus programs. Each app serves a distinct role — employee, supervisor, and admin — with tailored views, connected to the same ADP and Azure SQL backend.

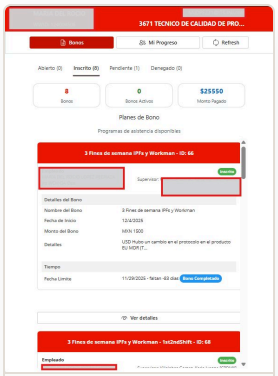
ADP API | Azure SQL | Azure Functions | Python | Power Apps Canvas

## EMPLOYEE APP · 15,000 USERS

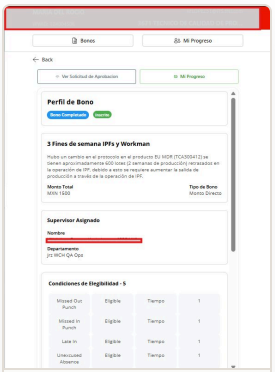
Employees track their own bonus progress, check eligibility conditions, and view payment history. Real-time ADP data, mobile-optimized.

## SUPERVISOR APP · 500 USERS

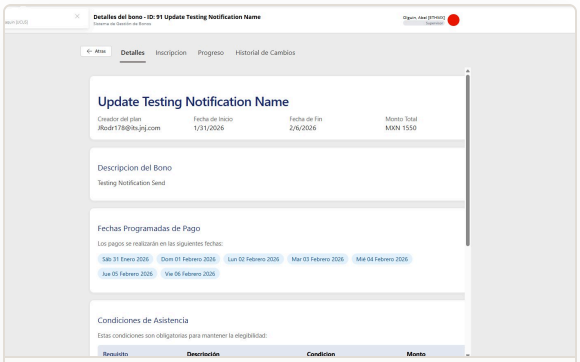
Supervisors see their team's enrollment, eligibility, and payment progress. Supports approval workflows and exception handling.



ENROLLED BONUSES



BONUS DETAIL



TEAM BONUS DETAIL VIEW

## ADMIN APP · INTERNAL

Admins configure bonus packages, set eligibility rules, and trigger batch calculations via Azure Functions running Python — all from a single canvas app.

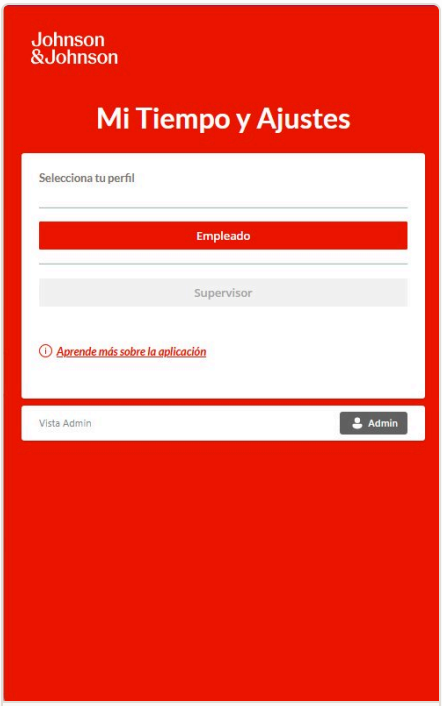
# Mi Tiempo y Ajustes

Mobile-first app enabling factory employees to view their time-sheet exceptions and submit corrections directly from the production floor. Single app with role-based routing — Employee, Supervisor, and Admin personas — reaching 17,000 users across multiple plants.

Azure SQL | Power Apps Canvas | Mobile | Multi-Role Routing



ROLE SELECTION SCREEN

## KEY FEATURES

- View attendance exceptions (late-in, missed punch, unexcused absence)
- Submit correction requests directly from mobile device
- Supervisor view for team-level exception management
- Admin panel for configuration and bulk operations

02 · POWER BI

# *Business Intelligence*

Three Power BI reporting solutions providing operational visibility across payroll, project management, and innovation programs — connecting Azure SQL data to plant leadership and program managers.

| 3 | 21K | 1 |
|---|---|---|
| REPORTS | EMPLOYEES TRACKED | DATA SOURCE |
